Applicator roller

for the coating of profiled and contoured work pieces using a roller coating machine or alternatively for a high-quality finishing of plane elements with a radius or bevelled edges.

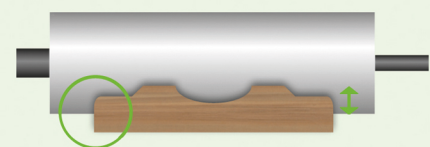

easy Pren

- high deformability and flexibility
- coating of bevelled edges and radius possible
- structure-free roller surface for high-quality paint finishes
- one roller for lacquer and oil
- cut and abrasion-resistant roller surface
- excellent resistance to paints and solvents
- new material technology with outstanding performance

xtra FleX

- extreme deformability and flexibility
- can withstand very high deflection
- reduced line pressure due to the compressibility
- protect workpiece and machine
